# Patent Agent

## Pharmaceuticals Cheshire

ICI Pharmaceuticals Division is one of the most successful organisations of its kind in the UK— inventing, developing, producing and marketing medicines for human and veterinary use, including several world leading products.

As a young (aged around 30) Patent Agent based at our R & D centre in Alderley Park, you will join a team of five Patent professionals— engaged in a vital role in this highly innovative company.

The work is intellectually demanding and stimulating and requires candidates who: are Chartered Patent Agents and/or European

Patent Attorneys; have a good background in organic chemistry; have good communications skills and can travel overseas as required (often at short notice). A reading knowledge of French and German coupled with familiarity with overseas patent practice would be advantageous.

The first rate remuneration and benefits package is designed to attract high calibre professionals able to make a significant contribution in this vital area of our work.

Send c.v. and salary details to:

**J. Eardley,  
Assistant Personnel Manager,  
ICI Pharmaceuticals Division,  
Meraside, Alderley Park,  
Near Macclesfield,  
Cheshire.**
